

Help Keep Our iN2L Systems Clean and Disinfected

Educate all staff on how to clean iN2L equipment to minimize the potential for cross contamination, particularly from usage by residents in isolation.

Clean and disinfect the systems daily.

- Wipe down the entire system with disinfecting wipes or disinfecting spray, including any remotes, handles, webcam, keyboards, tablets, etc.
- Use disinfecting wipes and microfiber cloths to remove any residue.

Wash your hands prior to using the system.

- For added protection, wash your hands immediately after using the system as well.
